PRINTED BY JOHN B. CLARKE.

1880.

CURTIS DAVIS & CO.,

Manufacturers of

STANDARD SOAPS.

No. 136 State Street, Boston.

'AMERICAN PEERLESS,' 'CURTIS DAVIS EXTRA,' 'GOLD DUST,'

— AND —

“ W - E - L - C - O - M - E ”

The cloth's-line of every consumer waves its banners in honor of the triumph of 'Welcome.'

Goods which have ever met with such public favor as the productions of CURTIS DAVIS & Co., must of necessity possess some superior or peculiar merit in washing quality, to have attained that universal popularity, and secured such an extensive demand wherever known.

This alone would seem to indicate that consumers recognize that superiority and excellence in soap, perceptible and made prominent by this firm in all of their standard brands, which is due perhaps to the fact that their aim has been not only to *produce the best*, but to never suffer competition or fluctuation in cost of material to affect their composition—but always keep their Soaps up to every original standard of quality and fix prices according to their actual value.

In the production of WELCOME SOAP, Curtis Davis & Co. submit that “as in other goods of their make” their aim has been to let *merit* alone represent every ingredient and subserve every purpose and object of its composition and use. It is composed of the most powerful detergent agencies known to Chemistry,—of great purity,—so effective (and yet harmless) as to make it the best, and in fact, cheapest washing compound now extant and can but extend the name and prolong the reputation of the manufacturers.

❧ CAUTION. ❧

The reputation of this firm has led to many and varied imitations of their brands, and only such as bear the name of “Curtis” preceding the name of “Davis,” on bar or wrapper, represent their goods.

For Sale by all Grocers.

The foregoing is a copy of the list of state, county, town, school, dog, and highway taxes, assessed on residents and non-residents in the town of Webster for the year 1879.

WILLIAM W. AUSTIN,
M. A. PILLSBURY,
JAMES H. TRUMBULL,

Selectmen of Webster.

SCHOOL REPORT.

FELLOW-CITIZENS,—The S. S. Committee submit the following, as their report for the year. Whole amount of money appropriated for the support of schools, \$790.45. Literary fund, \$88. From other sources, \$9. Amount of school money to each scholar, \$6.69. The amount appropriated to each district may be found by consulting selectmen's report. Number of visits by S. S. Committee, 33. By Prudential Committee, 12. By others, 237.

In district No. 5, there has been no school, for the want of scholars. The district voted to use the school money for repairs on the school-house. District No. 2 has had but one term. The school-house being unfit for school purposes, \$500 was voted to build a new one, which is nearly completed, and will be ready for occupancy for the summer school. It is a pleasant house, pleasantly located on a pleasant street. There was a short term of private school in district No. 3, taught by Miss Mary R. Webster. The schools for the most part have been, in a good degree, successful. Failure in all cases is not to be attributed to inability of teachers. Many injudicious remarks are made by parents and others in regard to teachers and management of schools, tending to lower them in the scholars' estimation, begetting prejudices, and destroying the teacher's power for good. Many scholars are allowed to leave school for the only reason that they are required *to learn their lessons, and obey the rules*. Are parents aware of the injury they are thus inflicting upon their children? They grow up in ignorance to become the votaries of superstition and victims of oppression. Yea, more: in countenancing violation of *school law*, parents encourage violation of *civil law*, and may be preparing their children for a gloomy prison cell, and themselves for a sleepless and guilty conscience.

The worth of school work is shown, not so much by what the pupils learn,—commit to memory,—but by what they understand and manifest in thought, speech, and writing. Adaptation of instruction, though simple, to the mental capacity of the pupil, is of first importance. Teachers should condescend to the level of the child; not speak in language which he cannot understand; become a leader just in advance of the class.

Prompt and constant attendance, short lessons well committed, pleasant remarks and explanations by teachers, produce the best results. Absence, tardiness, too many studies at a time and poorly demonstrated, tend to discouragement, indecision, confusion, and backwardness of many scholars.

A careful and attentive prudential committee, a capable, experienced, earnest teacher, watchful parents, well-disposed scholars, a good school-room, comfortable, convenient, well supplied with means for instruction, and, we suppose we must add, a good superintending committee, make a good school. For all of these, let us strive in the future.

DISTRICT NO. 1.—SWEATT'S MILLS.

Summer term, Miss Gustie Stone, teacher. Length of school in weeks, 7; whole number of scholars, 6; average attendance, $5\frac{2}{3}\frac{8}{5}$. Winter term, same teacher. Length of school in weeks, $6\frac{4}{5}$; whole number of scholars, 6; average attendance, $5\frac{2}{3}\frac{7}{4}$.

Miss Stone succeeded in awakening much more interest than is usual in so small a school. Teacher, pupils and parents all worked in harmony, and the school was profitable. The closing exercises were satisfactory. The register reports the house well ventilated, which we think is entirely correct.

DISTRICT NO. 2.—PLEASANT STREET.

Summer term, Miss Emma F. Putnam. Length of school in weeks, 8; wages per month including board, \$14; whole number of pupils, 23; average attendance, $22\frac{1}{2}$. This term was the last to occupy the old school-house; although it had grown old with age, it is doubtful if it had ever been made better use of as a house of instruction.

Miss Putnam had no experience as a teacher, but she laid out her work with great care and executed it with as much success as many teachers who are veterans in the work. The order was especially good. The system of instruction, the very best. To the parents and friends who were present, the closing exercises were gratifying. It is much to be regretted that the new school-house, for a long time nearly completed, could not have been finished in season for a winter school. H.

DISTRICT NO. 3. — CORSER HILL.

Summer term, Miss Vienna Dodge, teacher. Length of school in weeks, 6; wages per month including board, \$22; whole number of scholars, 18; average attendance, $15\frac{29}{38}$. This was the third term taught by Miss Dodge in this district. The committee was much pleased at his first visit; the teacher appeared perfectly at home, the scholars bright and active. We regret to say the school closed abruptly on account of sickness, without an examination, but we feel safe in saying the teacher fully sustained her former reputation.

Winter term, Miss Mary R Webster, teacher. Length of school in weeks, 12; wages per month including board, \$22; whole number of scholars, 20; average attendance, 17. After closing a private term, Miss Webster entered upon her work as instructor of the winter term. Most of the scholars and a good number of visitors were present at the examination. Good order was maintained. Questions met with prompt and ready answers, showing a thoroughness in learning lessons. The committee and parents present considered the school a success. P.

DISTRICT NO. 4. — BATTLE STREET.

Summer term, Miss Rosa J. Wooster, teacher. Length of school in weeks, 5; wages per month including board, \$19.60; whole number of pupils, 3; average attendance, 3. This is the smallest school in town. Each scholar attended the whole term without receiving a mark. The examination showed that the teacher had devoted her whole time to her pupils. Much oral instruction was given; the scholars acquired quite a knowledge of geography and arithmetic, never having studied text-books. P.

Winter term, length of school in weeks, 7; wages per month including board, \$20; number of scholars, 7; average attendance, $6\frac{4}{5}$. This was the second term taught by Mr. Herbert L. Call in this district. The school was small, and most of the scholars young. Commendable progress was made, and the school appeared well at the examination both as respects order and improvement. S.

DISTRICT No. 6. — LITTLE HILL.

Summer term, length of school in weeks, 8; wages per month including board, \$20; whole number of pupils, 7; average attendance, $6\frac{3}{8}$. The district was fortunate in securing the services of Miss Alla A. Norris of West Ep-ping, a successful and experienced teacher. There was a spirit of love and kindly feeling between teacher and pupils; good order was observed, and a good degree of improvement was shown at the close. S.

Winter term, same teacher. Length of school in weeks, 10; wages of teacher per month including board, \$24; whole number of pupils, 9; average attendance, $8\frac{7}{5}$. At our first visit we found the school in a prosperous condition; thoroughness seemed to be the motto, which was well carried out through the term. General satisfaction was given. P.

DISTRICT No. 7. — WHITE PLAIN.

Summer term, Miss Maggie A. Clough, teacher. Length of school in weeks, 8; wages per month including board, \$15; whole number of scholars, 6; average attendance, $5\frac{1}{2}$. This school is small, and the term was short; consequently large results could not be expected. Improvement was made by most of the scholars. Good attention was paid to map-drawing and penmanship. The drill in arithmetic lacked thoroughness. The school-room was handsomely decorated with leaves and flowers.

Winter term, Miss Nettie C. Sargent, teacher. Length of school in weeks, 10; wages per month including board, \$13.18; whole number of pupils, 7; average attendance, $5\frac{1}{2}$. The scholars appeared well at the examination, answering questions readily. The term was a profitable one. Quite a number of parents and friends were present, manifesting an interest in the welfare of the school. P.

DISTRICT No. 8.—BASHAN.

Summer term, Miss Susie C. Ferrin, teacher. Length of school in weeks, 10; wages per month including board, \$20; whole number of pupils, 21; average attendance, 20.

Winter term, same teacher. This is one of the largest and most advanced schools in town, and there are few who have not had experience as teachers who would make this school an entire success. Miss Ferrin possesses rare qualifications as a teacher, and labored very hard to interest and instruct her pupils. Good advancement was made, and thorough instruction given. The order, which compared quite favorably with previous terms, was not as good as we would like. H.

DISTRICT No. 9.—PUTNEY.

Summer term, Miss Cora E. Putney, teacher. Length of school in weeks, 9; wages per month including board, \$19; whole number of pupils, 22; average attendance, $20\frac{9}{4}$. Miss Putney worked hard for the interest of the school, and the result was quite satisfactory. The scholars acquitted themselves very creditably in the different branches taught. "A prophet is not without honor save in his own country," does not apply to Miss Putney.

Winter term, Mr. Robert Frame, teacher. Length of school in weeks, $9\frac{2}{5}$; wages per month including board, \$30.60; whole number of pupils, 27; average attendance, $24\frac{5}{8}$. Mr. Frame showed a willing mind and a disposition to work. The progress was good. A little insubordination on the part of some of the scholars was an injury to the school. This is an interesting and intelligent school, and the united efforts of parents and teachers will place it among the first in town. P.

ROLL OF HONOR.

Including the names of all the pupils who have been present every half-day of a term without being tardy:—

Burbank, Nellie L.,	Kilburn, Mary I.,

WHAT FERTILIZER IS CHEAPEST

For Farmers to Use?

—:O:—
The above question is being asked by thousands of farmers daily; we answer it fairly: use the fertilizer that has proved the most profitable, and has been uniformly the most reliable year after year.

Buy the Old, Tried and Reliable Brand,

BRADLEY'S SUPERPHOSPHATE.

Warranted uniform in quality, quick in action, and the most concentrated and powerful in the market. Having stood the test of 20 years on more than 300,000 acres per year, it is justly entitled to the position it has so long held,

FIRST AMONG ALL COMPETITORS.

—:O:—
OUR MOTTO:—We believe in theories, when supported by practical proofs; we believe in practical proofs, whether supported by theories or not.

BRADLEY FERTILIZER COMPANY,

27 KILBY ST., BOSTON.

*For sale by Humphrey, Dodge & Smith, Concord, and
by Reliable Dealers everywhere.*

HARDWARE AND AGRICULTURAL TOOLS.

—:O:—
HUMPHREY, DODGE & SMITH,
